# A Superior Product Range for Water Supply

The WaterProfi by **LUDECKE**® series offers high-end and durable fittings for various water applications.

Whether for private or commercial gardening, landscaping, agriculture, food industry, for cleaning or supply services at industrial workplaces or for drinking water applications – we provide the right product for any need.

All parts are compatible with standard plug profiles and coupling systems and can be combined as desired.

#### Advantages:

- High-end and extremely robust materials
- Absolutely leakage-proof and durable
- Simple and intuitive to use
- Different sizes, connection and valve types
- Compatible with standard plug profiles and coupling systems

**WaterProfi**®  
by **LUDECKE**

## Broad Range

The WaterProfi by **LUDECKE**® water fittings are available in different sizes and versions.

**NEW!**

To further improve handling, the quick connect couplings have been thoroughly revised and optimised.

With regards to claw couplings, we offer the classic WaterProfi version as well as couplings for drinking water applications and strict hygiene requirements.

In addition to quick connect and claw couplings, the **LUDECKE** water range includes a technically sophisticated wand nozzle. It ensures simple and professional watering of large areas and guarantees enormous flexibility thanks to its modular design.

Specially adapted accessories complete our range.

# Materials

## Brass (Plain/ Nickel-Plated)

Most of the **LUDECKE** water fittings consist of brass MS 58 (machining brass). It is a very sturdy material which guarantees high durability and is perfectly suited for galvanization (nickel, chrome).

## Chromium Steel (Similar to Stainless Steel 1.4401)

Chrome steel/ stainless steel is recommended for applications with specific hygiene regulations. This material has a special degree of purity and is suitable for the production of long-lasting and low-maintenance products.

## Seals

Depending on the requirement **LUDECKE** offers various types of sealings made of NBR, FKM and EPDM.

# Maximum Flexibility with Perfectly Matching Components

The WaterProfi by **LUDECKE**® range allows to set up a customised and flexible water system for various applications and can be easily extended. We are happy to help you find a tailored solution.

# Quick Connect Couplings and Spray Nozzles

The WaterProfi by **LUDECKE**® quick connect couplings are entirely made of nickel-plated brass. This makes them more robust and wear-resistant compared to similar plastic couplings.

**NEW!**

To guarantee enhanced usability, the quick connect couplings have been thoroughly optimised.

For example, the new compact version is now very light in weight. The ball shut-off further improves one-hand operation and greatly facilitates your job. The smooth surfaces avoid dirt from collecting and are easy to clean.

All quick connect couplings can be combined with the WaterProfi by **LUDECKE**® spray nozzle and wand nozzle.

#### Advantages:

- High-quality materials
- Robust, absolutely leakage-proof and durable
- Easy to couple
- Compact size and ergonomic sleeve outline
- Smooth surfaces to prevent dirt from collecting
- Wide pressure range and high flow rates
- Compatible with standard plug profiles
- Different sizes, connection and valves types

**WaterProfi**®  
by **LUDECKE**

## Excellent Quality for Trouble-Free Use

The quick connect couplings are ideally suited for water pipes in industrial applications, trades, gardening, landscaping or private households. Due to their one hand operation, they can be used especially in areas which require a quick and flexible way of working.

# Connected in Seconds

To connect, push the plug into the coupling. The locking sleeve automatically slides towards the plug and engages.

To disconnect, use one hand to hold the plug firmly. With your other hand push back the locking sleeve and pull the plug from the coupling. After disconnecting, the locking sleeve automatically slides back into its original position (when using non-valved couplings, shut off the media supply before disconnecting).

## WaterProfi Spray Nozzle

The WaterProfi by **LUDECKE**® spray nozzle is characterised by its innovative design and sophisticated technical features. The front part of the nozzle is made of nickel-plated aluminium to minimize weight. All other parts are made of brass. At the nozzle orifice, an additional sealing ring prevents leakages. The knurled sleeve allows for a firm grip which enables safe handling even in wet conditions.

### Easy Flow Control - from Mist to Full Water Jet

The water jet can be easily adjusted or turned off by turning the front part of the nozzle without increasing the nozzle length. Thanks to the perfect interaction between the valve spindle and the inner geometrics of nozzle and nozzle valve the WaterProfi Spray Nozzle enables a fine-tuned flow control from mist to full water jet.

# Quick Connect Couplings

## Series WPN made of Brass nickel-plated

**DN 9**

- One-hand quick connect couplings made of brass MS 58 nickel-plated
- Easy to couple, wide pressure range, leakage-proof, durable, robust, safe and reliable
- Compact size and ergonomic sleeve outline for perfect usability
- High flow rates due to optimised passage
- Spray nozzle: water flow can be turned off, flow control from mist to full water jet
- Compatible with standard plug profiles
- Optional with straight-through or shut-off valves
- **Universal one-hand quick connect coupling for water pipes in industrial applications, trades, landscaping, gardening or private household**

**Materials:**

- Body, sleeve, valve body, valve, plug: Brass MS 58 nickel-plated
- Balls: Stainless steel 1.4034
- Springs: Spring steel 1.4310
- Seals: NBR/ HNBR
- Claw: Brass CW617N
- Spray nozzle: Aluminium/ Brass MS 58 nickel-plated

# Wand Nozzle

In nurseries, commercial landscaping or private gardens: in these areas, products are required which enable easy and thorough watering of beds and green areas. At the same time, working should be created as simple as possible.

This is what the WaterProfi by **LUDECKE**<sup>®</sup> wand nozzle offers: targeted and extensive watering with minimal effort and maximal comfort.

Thanks to its modular design, the wand nozzle can easily be customised. For this purpose, different spray heads, tube lengths and connection types are available. The handle made of soft PVC neutralises temperature fluctuations making gloves unnecessary. Due to its comfortable surface material and ergonomic design, the wand nozzle is comfortable to hold even after long use.

## Sophisticated dispensing system using slide valve technology

The highlight of the WaterProfi by **LUDECKE**<sup>®</sup> wand nozzle is the slide valve technology. This means the waterjet can be adjusted smoothly by simply sliding the sleeve on the handle. The sleeve remains at the set position and relieves your hand during continuous spraying.

**WaterProfi**<sup>®</sup>  
by **LUDECKE**

## Convincing Performance

### High-quality

- Robust and durable wand nozzle providing high range
- Sophisticated technology of the handle (slide valve technology)

### Ergonomic

- Handle made of soft PVC (pearl structure): The Wand Nozzle is comfortable to hold and neutralizes temperature fluctuations (when cold or hot water passes through)
- Light weight – for extended and comfortable use

### Flexible

- Interchangeable components
- Connecting types compatible with standard plug profiles and coupling systems

# High-Quality Components

**Spray head in several sizes**  
(Ø 30/ Ø 52 mm)  
and with different bores  
(Ø 0.7/ Ø 1.0 mm)

Ø 52 mm, Bore 1.0 mm

Ø 52 mm, Bore 0.7 mm

Ø 30 mm, Bore 1.0 mm

**Registered Design**

**Slide valve technology** (registered design): water volume can be smoothly adjusted

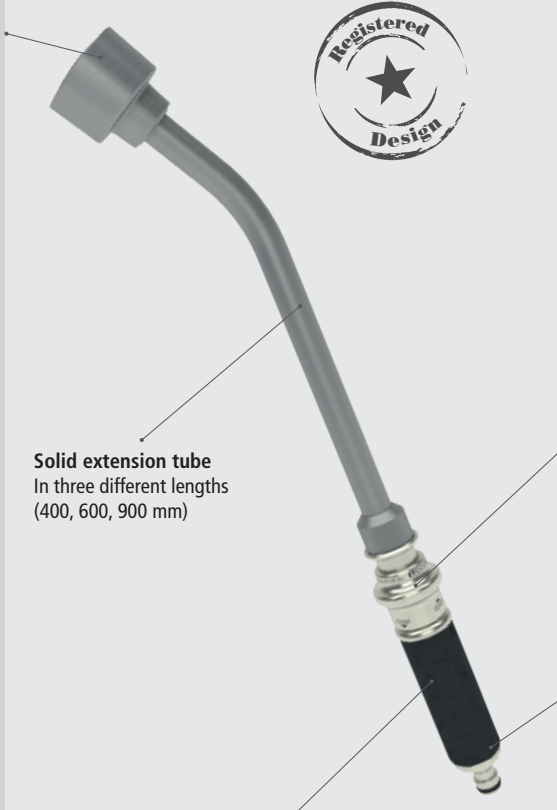

**Solid extension tube**  
In three different lengths  
(400, 600, 900 mm)

**Sieve in Handle**  
Dirt protection

**Different connection types**  
for great flexibility

- Female Thread
- Claw Coupling
- Plug System WPN DN 9

# Highly Versatile

The WaterProfi by **LUDECKE**® wand nozzle is highly versatile and adjusted to different needs.

# Wand Nozzle

**Water<sup>®</sup>  
Profi**  
by **LUDECKE**

- Adjustable wand nozzle with one-hand operation and spray head up to 60 l flow rate
- Sophisticated dispensing system using slide valve technology
- Various spray heads, tube lengths and connectors
- Soft and comfortable handle
- Sieve in handle protects against dirt
- For commercial landscaping and private gardens, tree nurseries, etc.

## Materials:

# Claw Couplings

The WaterProfi by **LUDECKE**® claw couplings are entirely made of brass making them very durable and wear-resistant.

Additionally, the couplings are extremely weather and temperature resistant and guarantee a particularly secure grip. WaterProfi claw couplings are compatible with all common water claw couplings with a claw distance of 40 mm.

The couplings can be easily combined with the matching classic WaterProfi spray nozzle and the wand nozzle.

#### Advantages:

- Robust, safe and reliable
- Easy to couple
- High pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness
- Ergonomically formed claws, safety notches against accidental loosening
- Extra protection due to MODY-safety-screwing-claw coupling
- Compatible with standard coupling systems
- Different sizes and connection types

**WaterProfi**  
by **LUDECKE**

## Top Quality for Trouble-Free Working

The WaterProfi by **LUDECKE**® Claw Couplings are especially suitable for applications with high water pressure or for rough working conditions. To ensure a perfect grip, we recommend using the MODY-safety-screwing-claw coupling. It has a locking nut which can be manually tightened and prevents the coupling halves from loosening.

# Connected in Seconds

Push the two couplings together at 180° degrees opposite to each other until the seal faces touch. Afterwards, rotate one coupling half as far as it will go into the opposite direction of the other - the couplings lock into place.

To disconnect, push the coupling and the counterpart together in axial direction. Afterwards, turn one coupling half as far as possible in the opposite direction as you would do when connecting and remove it from the counterpart.

## The Classic WaterProfi Spray Nozzle

The WaterProfi series offers further premium spray nozzles. They are conically metal sealed and – depending on the application and requirements – available with hose connection or claw coupling.

### Easy Flow Control - from Mist to Full Water Jet

By twisting the nozzle head, the spray nozzle allows for perfect flow control with smooth transition from mist to full water jet.

# Claw Couplings

made of Brass for Water

- Claw Couplings made of forged brass CW617N
- Easy to couple, high pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness as well as safe and hose-friendly hose barbs
- Ergonomically formed claws, safety notches against accidental loosening
- High-performance O-ring made of EPDM with perfect elasticity and resistance
- Compatible with all common water claw couplings with a claw distance of 40 mm
- O-ring compatible with most common sealing rings
- Spray Nozzle: can be turned off, flow control from mist to full water jet
- [Universal coupling for water pipes in industrial applications, construction, trades, agriculture or private household](#)

# GEKA plus Claw Couplings for Drinking Water Applications

The GEKA plus claw couplings made of forged brass are the perfect all-rounders for drinking water applications.

These products are approved according to DIN 50930/6 and DIN 17660. Moreover, these claw couplings have a patented high-performance rubber ring made of NBR with excellent elastic properties as well as a KTW approval according to D2 and long-term test result DVGW W270.

DVGW  
tested and  
approved

#### Advantages:

- Easy to couple
- High pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness
- Safe and hose-friendly hose barbs
- Ergonomically formed claws, safety notches against accidental loosening
- Different sizes and connection types

## Easy Handling - Safe and Firm Grip

GEKA plus claw couplings are connected the same way as WaterProfi by **LUDECKE**® claw couplings. Push the two couplings together at 180° degrees opposite to each other until the seal faces touch. Afterwards, rotate one coupling half as far as it will go into the opposite direction of the other - the couplings lock into place.

# GEKA plus Claw Couplings

made of Brass for Drinking Water Applications

- Claw Couplings made of forged brass CW617N, DIN 50930/6 and DIN 17660
- Easy to couple, high pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness as well as safe and hose-friendly hose barbs
- Ergonomically formed claws, safety notches against accidental loosening

# GEKA plus Claw Couplings for Strict Hygiene Requirements

GEKA plus Claw Couplings made of chromium steel are the universal couplings for applications in the chemical industry, for water, lye and different aggressive media as well as strict hygiene requirements.

The products have a patented high-performance sealing ring made of FKM with excellent elasticity properties. Depending on the application, we recommend hose clips or clamps for fixation.

#### Advantages:

- Easy to couple, high pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness
- Safe and hose-friendly hose barbs
- Ergonomically formed claws
- Safety notches against accidental loosening
- Different sizes and connection types

## Easy Handling – Safe and Firm Grip

GEKA plus claw couplings are connected the same way as WaterProfi by **LUDECKE**<sup>®</sup> claw couplings. Push the two couplings together at 180° degrees opposite to each other until the seal faces touch. Afterwards, rotate one coupling half as far as it will go into the opposite direction of the other - the couplings lock into place.

# GEKA plus Claw Couplings

made of Chromium Steel for Applications with Strict Hygiene Requirements

strict hygiene requirements

- High-quality couplings made of chromium steel similar to Stainless Steel 1.4401
- Easy to couple, high pressure and vacuum range, reduced tilting moment
- Maximum passage through perfect wall thickness as well as safe and hose-friendly hose barbs
- Ergonomically formed claws, safety notches against accidental loosening
- Patented high-performance rubber ring made of FKM (DIN ISO 1629) with excellent elastic properties
- [Universal coupling for applications in the chemical industry for water, lye or aggressive media](#)

## Materials:

- Claw, connector: Chromium steel similar to Stainless steel 1.4401
- Seals: FKM

# Accessories

Apart from couplings and spray nozzles, **LUDECKE** offers a broad range of accessories.

## Swivel Transmissions

**LUDECKE** swivel transmissions are designed for hose or tubing applications in components which have to withstand high stress caused by rotations at the connections (e.g. hose reels or wall hose reels).

- Avoids any kind of kinking and abrasion to the hose and hose connection
- Media is smoothly transported to drop-off-point
- For applications with unwinding which experience heavy strains due to vibrations, twisting and sideways movements at connections

## Hose Screw Type Fittings

WaterProfi by **LUDECKE**® hose screw type fittings are used as quick-release connections for hoses or tools. They are an alternative to common coupling systems.

We recommend this product especially to connect hose reels or wall hose reels to hoses.

- Solid connection between hose and tool
- Robust, safe, leakage-proof and durable
- Available in plain brass and nickel-plated brass

## Additional Accessories

- Fittings
- Ball valves taps
- Return valves and check foot valves with strainer
- Thread stems with male thread and hose squeeze nut ferrule
- Hose clamps, hose clips made of steel and stainless steel, ferrules for low pressure hose lines, hand-operated assembly machine

# Swivel Transmissions

made of Brass for Water

- Swivel Transmissions made of brass MS 58 nickel-plated
- High resistant swivel joint, with enhanced flow rates
- For pneumatic and fluid applications with rotations and heavy strains due to vibrations, twisting and sideway movements

## Materials:

- Swivel transmission: Brass MS 58 nickel-plated
- Seals: EPDM

Max. Working Pressure	Temperature	Thread	Media	
PN 10 bar	+95°C	ISO 228	Water	1

# Fittings and Ball Valve Taps

made of Brass

- Distributors, T-Connectors, elbow-connectors and ball valve taps
- Different sizes for all kinds of application
- Robust, solid and reliable
- Maximum passage
- For water supply in industry, trades, agriculture and private households

## Materials:

- Y-Distributor, T-Connector, Elbow-Connector: Brass MS 58 plain
- Tap-housing: Brass MS 58 nickel-plated
- Handle: Aluminium red
- Balls: hard chromium plated

Max. Working Pressure	Thread	Media	
PN 10 bar	ISO 228	Water	5

# Return Valves and Check Foot Valves with Strainer

made of Brass

- Return valves shut off water flows in one direction. Check foot valves are return valves assembled with a strainer.
- Avoid draining of the suction line, after pump has been switched off
- Perfectly tight hold even with very low pressure through Nitril rubber sealing
- Hostaform wedge with double central slide

## Materials:

- Body: Brass MS 58 plain
- Valve: Nylon
- Springs: Stainless steel
- Seals: Nitril

Max. Working Pressure	Temperature	Opening pressure	Thread	Media	
PN 16 bar	up to +100°C	approx 0.02 bar	ISO 228	Water	1

# Thread Stems with Male Thread and Hose Squeeze Nut Ferrule

made of Brass for Water for Perfect Hose Assembly

- Easy hose assembly with thread ferrule, multiple use and detachable
- Hose assembly without dead space for optimised safety and hygiene standards
- No dirt accumulation between hose and hose barb
- According to DIN EN 14 424
- Please note correct hose wall dimensions

## Materials:

- Screw connection: Brass MS 58 plain

Max. Working Pressure	Temperature	Thread	Media	
PN 25 bar	up to +95°C	ISO 228	Water	10

# High-Performance Hose Clips

made of Steel W1 (DIN 3017)

- High-performance hose clips made of steel W1, free of chrome VI, zinc-plated and thick layer passivated
- Optimum sealing through high belt tension – maximum strip safety
- Hose-protective through rounded edges and smooth band insides
- Thinner screw body with new suspension, hence improved tightening and fracture torque
- Material and clamp range stamped at inner band side
- Hexagon screw with cross-slotted head
- Optimum distribution of tension over complete hose diameter
- Up to size 90 in boxes, sizes 100-180 in plastic bags, from size 190 individually
- For safe, fast and removable assembly of various hoses and fittings for different media

## Materials

- Band, body, screw: Steel W1 zinc-plated and thick layer passivated

# High-Performance Hose Clips

made of Stainless Steel W5 (DIN 3017)

- High-performance hose clips made of stainless steel W5
- Optimum sealing through high belt tension – maximum strip safety
- Hose-protective through rounded edges
- Stamped band
- Thinner screw body with new suspension, hence improved tightening and fracture torque
- Material and clamp range stamped at inner band side
- Hexagon screw with cross-slotted head
- Optimum distribution of tension over complete hose diameter
- Up to size 90 in boxes, size 100 in plastic bags
- For safe, fast and removable assembly of various hoses and fittings for different media

## Materials

- Band, body, screw: Stainless Steel W5

Norm

DIN 3017

## High-Performance Hose Clips, band and lock made of stainless steel W 5

# Ferrules for Low Pressure Hose Lines

- Ferrules made of annealed steel zinc-plated and yellow passivated
- Easy, fast and absolutely safe hose crimping with **LUDECKE** hand-operated assembly machine SPR-333 up to type LPH-23
- No risk of injury, clean and unsolvable connection
- [For crimping of various hoses and fittings for different media](#)

## Materials

- Body: annealed steel zinc-plated and yellow passivated

Max. Working Pressure

PN 16 bar

## Ferrules for Low Pressure Hose Lines

D	for hose		L	D1	Assembly-M.	Weight	☐	Type No.
	DIN 20018	water PVC

23		13x3	32	17	SPR 333	18	100	LPH-23
25	13x5		32	17		19	100	LPH-25
28	15x6		32	20.5		22	100	LPH-28
30.5		19x4	33	24.3		24	100	LPH-30
33	19x6		35	24.8		40	25	LPH-33
38		25x4.5	35	28		47	25	LPH-38
41	25x7		40	30		64	25	LPH-41

For higher working pressure we recommend hydraulic crimping with turned steel-ferrules type PH (☐ page 245) or on request.

# Hand-Operated Assembly Machine

for Low Pressure Ferrules

- Crimping machine for easy and safe assembly of low-pressure hoses from 3 to 16 mm Hose i.D.
- **Clean:** Exact assembling of fitting, hose and ferrule through centric crimping of the ferrule
- **Simple:** Fast assembling quick and easy
- **Reliable:** Improved safety through perfect fit
- **Safe:** Reduced danger of injury
- With two crimping-jaw sets for crimping range from 3 to 9 mm and from 10 to 16 mm.
- **Flexible:** For mobile use

## Assembly Machine
